

How to Register Your Pet Dog in Noida (Step-by-Step 2025 Guide)

The Noida Authority has made **pet dog (and cat) registration mandatory** within city limits. Registration is not just a formality – it's tied to anti-rabies vaccination, sterilisation, and public safety rules, and there are fines for non-compliance.

The process today is largely **online** through the **Noida Authority Pet Registration (NAPR) app**.

This article walks you through:

- Who must register
- Documents you need
- Step-by-step process on the NAPR app
- Fees, validity and renewal
- Penalties and key responsibilities as a pet parent
- Difference between **Noida** (NAPR app) and **Greater Noida** (GNIDA Mitra app)

1. Legal background: Why registration is mandatory in Noida

Under Noida's pet policy (first publicised in 2022–23 and updated through subsequent advisories), every pet dog within Noida municipal limits must be registered with the Authority. Key points:

- **Mandatory registration:** All pet dogs must be registered on the **Noida Authority Pet Registration (NAPR) app**.
- **Annual fee:** The policy sets an **annual registration fee of ₹500 per pet**, payable in April each year.
- **Vaccination & sterilisation compulsory:** Anti-rabies vaccination and sterilisation (neutering/spaying) are mandatory; non-compliance can attract additional monthly fines.
- **Deadlines & fines:** The Authority has repeatedly fixed deadlines (for example, 31 January 2023) and announced late fees and daily penalties for delayed registration.

A later summary of Noida's pet policy also highlights fines like:

- ₹2,000 for **failing to sterilise** a pet
- ₹5,000 for running an **unauthorised breeding centre** at home
- ₹10,000 in **dog-bite cases**, in addition to other liability

So, registering your dog is both a **legal requirement** and a way to show you're a responsible pet parent.

2. Online dog registration in Noida – Overview

For residents of **Noida (not Greater Noida)**, the official mode is:

Noida Authority Pet Registration (NAPR) mobile app, available on Android and iOS.

Multiple guides (including Economic Times, ezyLegal and pet-care portals) describe the same app-based flow: download the app, create an account, select “**New Registration**”, fill dog & owner details, upload documents, pay the fee, and download your digital registration certificate.

⚠ **Note:** Some pet owners have recently complained that the NAPR app is occasionally hard to find or buggy.
If you cannot locate the app, contact the Noida Authority helpline or visit the Authority office with your documents and screenshots; they can guide you on the current registration mode.

3. Documents & information you need (Checklist)

Before you open the app, keep these ready – it makes the process much smoother:

Owner's documents

- **Photo ID & address proof** (Aadhaar, voter ID, passport or utility bill showing Noida address)
- **Mobile number** (this will be used for OTP/login on the app)

Dog's details

- Name, breed, colour and markings
- Age and date of birth (approximate, if exact is unknown)
- Sex (male/female)
- Whether sterilised or not

Health records

- **Rabies vaccination certificate** (recent and valid, issued by a registered vet)
- Other vaccination records (6-in-1 etc., if available)

- **Sterilisation certificate** (if done)

Photos & digital signature

- 1–2 **clear photographs of your dog**
- 1 photograph of **you with your dog** (some guides mention this as a requirement)
- Your **digital signature** (can often be done by signing on paper and uploading a scanned photo if the app requires it)

4. Step-by-step: How to register your dog on the NAPR app

This is the standard process described by the Noida Authority and major guides.

Step 1: Download the Noida Authority Pet Registration (NAPR) app

1. Open **Google Play Store** (Android) or **Apple App Store** (iOS).
2. Search for “**NAPR – Noida Authority Pet Registration**” or similar.
3. Verify that the publisher is **Noida Authority** or clearly linked to it. (npr-noida-authority-pet-reg.appstor.io)
4. Install the app.

If you cannot find it, check the Noida Authority’s official website or social pages; they often share direct links and updates regarding the app status.

Step 2: Create your user profile

1. Open the app and choose “**Sign up**” / “**Register**”.
2. Enter:
 - Your **name**
 - **Mobile number** (you’ll receive an OTP)
 - Basic contact details (email, address)
3. Verify the OTP and complete signup.

Step 3: Start a new pet registration

On the home screen, look for “**New Registration**” or “**Add Pet**”:

1. Tap “**New Registration**” (as specifically mentioned in official instructions and media guides). ([The Economic Times](https://www.economictimes.com))
2. Select **Dog** as the animal type (if the app also supports cats).

Step 4: Fill in your dog’s details

You will typically be asked for:

- Dog's **name**
- **Breed** (Labrador, Indie, Beagle, etc.)
- **Sex**
- **Age and date of birth** (or approximate)
- **Colour and identifying marks**
- **Date of last rabies vaccination** and other vaccinations

Double-check spellings and dates; this information appears on your registration certificate.

Step 5: Upload documents and photos

The app will then prompt you to upload:

- **Owner's ID / address proof**
- **Rabies vaccination certificate** (PDF/JPEG)
- **Sterilisation certificate**, if the dog is already neutered/spayed
- **Dog's photos** and possibly a **photo of you with the dog**

Some guides also mention uploading a **digital signature**. If required, you can sign on paper, take a clear photo, and upload it.

Step 6: Agree to terms and pay the fee

1. Review the filled form and documents.
2. The app will show **terms & conditions**; read and tap **"I Agree"**.
3. Proceed to payment:
 - Registration fee is generally **₹500 per dog per year**, payable in **April**.
 - Payment modes usually include **debit/credit card, net banking, UPI and other gateways (e.g., SAMPAY)**.

Keep a screenshot or PDF of the payment confirmation for your records.

Step 7: Get your registration certificate

After successful payment:

- Your application is submitted to the Noida Authority.
- A **digital registration certificate** is generated on the app; you can **download or screenshot it**.
- You may receive a **unique registration number** which you should quote in future correspondence or complaints.

It's good practice to:

- Print a copy and keep it at home.

- Save a soft copy in your phone / email.
- Share with your RWA/AOA if they ask for proof of registration.

5. Validity, renewal & changes

Validity and renewal

- Registration is generally **valid for one year**.
- **Renewal** is required annually, with fee payable in April.
- Use the “**Renew**” or equivalent option in the app, upload updated vaccination records, and pay the fee again.

Change of ownership

If you rehome your dog (adoption or sale):

- The registration should be **updated to reflect the new owner's name**.
- Practically, this may mean the new owner registering the same pet under their account on the app, with updated documents.

Lost or deceased pet

- For a **lost pet**, you should:
 - Inform local authorities and your RWA
 - Use the registration details (ID, certificate) as proof that the dog is yours.
- In case the pet **passes away**, some guides recommend informing the Authority via the app or contact channels so that records can be updated.

6. Penalties for non-registration & non-compliance

Based on the Noida pet policy and explanatory articles:

- **Missing the registration deadline** (for example, 31 January 2023 in earlier notifications) attracts late fees and escalating penalties.
- **Keeping an unregistered pet** can lead to fines and potential legal action.
- **Failure to sterilise your dog** can attract about **₹2,000 per month** as penalty.
- **Running an unlicensed breeding set-up** can attract around **₹5,000**.
- In **dog-bite incidents**, policy notes fines around **₹10,000**, apart from medical expenses or other liabilities.

These amounts and structures can be tweaked by the Authority over time, so always check the latest circulars or notifications.

7. Responsibilities of pet parents in Noida (beyond registration)

The Noida pet policy and various guides emphasise that registration is just the starting point. Key ongoing responsibilities include:

- **Leash control & supervision**
 - Keep your dog on a leash in public spaces.
 - Never leave your pet unattended in common areas.
- **Noise & nuisance control**
 - Prevent excessive barking or aggressive behaviour that disturbs neighbours.
 - Work on training and socialisation.
- **Cleanliness**
 - Always **pick up your dog's waste** in public/residential areas.
 - Carry poop bags when walking your dog.
- **Use of lifts/common areas**
 - Many advisories suggest using **service elevators** with pets.
 - If another resident objects, let them go first instead of forcing a conflict.
- **Health & vaccination**
 - Keep vaccinations, especially **rabies**, up to date.
 - Sterilise your pet as required by policy.

These behavioural rules are often enforced through RWAs, AOAs, and resident complaints, with the Authority able to act in serious cases.

8. Noida vs Greater Noida: Don't mix up the apps

A common point of confusion: **Noida** and **Greater Noida** have **different authorities and different apps**.

- **Noida city** ⇒ **Noida Authority Pet Registration (NAPR) app**, with an annual fee historically around ₹500.
- **Greater Noida** ⇒ **GNIDA Mitra app** (Mitra), run by the Greater Noida Industrial Development Authority (GNIDA). Registration there has been rolled out as **free**, under a separate pet policy, with its own deadlines and fines.

Your registration must be done with the **correct authority based on where you actually live** (check your address, RWA notices and property tax/utility area).
